

PRESIDENT BIDEN'S RECORD ON CARPENTER ISSUES

FIGHTING FOR UNIONS & WORKING FAMILIES

President Biden has appointed pro-labor officials who have expanded our rights to organize and are fighting back against wage theft and tax fraud. He always stands up for unions, has opposed so-called "Right to Work" laws and is the first sitting president in history to walk a picket line with striking workers.

WAGES, TRAINING & PENSIONS

President Biden has protected and expanded the federal Davis-Bacon Prevailing Wage Law that creates union jobs and helps our contractors stay competitive. He has taken action to promote our industry-leading apprentice programs and passed legislation to strengthen our union pension plans.

CHIPS AND SCIENCE ACT & THE INFLATION REDUCTION ACT

These bills are growing our economy, fighting climate change, and lowering the cost of prescription drugs. They will create more than one million construction and manufacturing jobs that require the payment of prevailing wages and encourage the use of apprenticeships and PLAs.

PRESIDENT BIDEN'S BIPARTISAN INFRASTRUCTURE PLAN

Is investing \$1.2 trillion dollars in our roads, bridges, transit systems and public infrastructure projects. This legislation is creating more than 100,000 jobs for union carpenters across the country, will help grow our economy, and will build stronger and healthier communities.
