Local 56 Welder Recruitment

Who We Are Looking For

Local 56 is actively recruiting experienced field welders with certifications in:

- SMAW (Stick Welding)
- FCAW (Flux Core / Wire Feed Welding)
- AWS D1.1 Structural Welding
- AWS D1.5 Bridge Welding
- 3G and 4G Welding Positions
- MassDOT Welder Qualification Certification ("Green Card")

Why Your Certifications Matter

A current MassDOT Green Card demonstrates that you are qualified to perform field welding on bridge and transportation projects. It verifies your welding process, position, and material qualifications and is recognized throughout the heavy civil and bridge construction industry.

Work Opportunities

Local 56 welders work on:

- Bridge construction and rehabilitation
- Marine and waterfront construction
- Docks and piers
- Heavy civil infrastructure projects
- Offshore wind projects
- Pile driving operations

Questions for Prospective Welders

- Do you currently hold a valid MassDOT Green Card?
- Are you certified in SMAW (Stick), FCAW (Flux Core/Wire Feed), or both?
- Do you hold current 3G and/or 4G welding certifications?
- Are your AWS D1.1 or D1.5 certifications current?
- How much bridge, structural, marine, or heavy civil welding experience do you have?
- Have you performed field welding or primarily shop welding?
- Are you willing to travel throughout New England?

Immediate Need

Qualified Stick and Wire Feed welders with 3G and 4G certifications are in high demand throughout New England. Local 56 contractors are seeking welders with bridge, marine, and heavy civil experience who can contribute immediately on major infrastructure projects across the region.
